Umar Nisar

Founder, Nexic Technologies | Co-Founder, Buylish Hub

Umar Nisar is a digital entrepreneur, marketing professional, and e-commerce operator with experience spanning **e-commerce, influencer marketing, social commerce, digital advertising, business development, and online business growth.**

Nexic Technologies

Umar is the **Founder of Nexic Technologies**, a digital growth and technology agency focused primarily on helping businesses in the United Kingdom and international markets build, market, and scale their online presence.

Nexic provides services across:

- Website Design & Development
- Video Production & Editing
- Graphic Design & Creative Development
- Paid Social Advertising
- Google Advertising & Search Marketing
- Digital Marketing Strategy
- E-commerce Growth & Optimization

Buylish Hub

Umar is also the **Co-Founder of Buylish Hub**, an online retail business in Pakistan, where he is actively involved in the day-to-day operation and growth of the business. From website development and product presentation to creative direction and paid advertising, the business manages its digital activities in-house across **Meta, Google, and TikTok**.

Running an e-commerce business himself has given Umar a practical understanding of what it takes to build and grow an online business. Every decision directly impacts revenue, customer acquisition, conversion, and profitability. This hands-on experience forms a central part of his approach to working with clients through Nexic Technologies.

Professional Experience

Before founding Nexic Technologies and co-founding Buylish Hub, Umar spent approximately **three and a half years at WALEE**, one of Pakistan's prominent influencer marketing and social commerce platforms.

During his time at WALEE, he worked within an ecosystem involving a network of **50,000+ creators**, gaining extensive exposure to influencer marketing, social commerce, creator-brand relationships, campaign execution, and digital brand growth.

Prior to WALEE, Umar worked in **Business Development at Go Viral**, where he further developed his experience in sales, partnerships, client acquisition, and business growth. He began his professional career at **CarFirst**, gaining early exposure to structured business operations and professional environments.

Education

Umar holds an **MBA in Marketing**, complementing his practical experience with formal expertise in marketing strategy, business development, consumer behaviour, and brand management.

A Practical Approach to Digital Growth

Platform → Agency → Operator

Umar's professional journey has taken him through three important perspectives of the digital business ecosystem. His experience across these areas allows him to understand digital businesses from multiple angles—not only how campaigns are marketed, but also how websites convert, how customers make purchasing decisions, how creators influence audiences, and how business owners evaluate marketing against actual commercial results.

The objective is not simply to generate traffic, produce content, or launch advertising campaigns. The objective is to build digital systems that contribute meaningfully to **visibility, customer acquisition, conversion, and business growth**.

Founder’s Perspective

> *“I believe the best digital marketing decisions come from understanding the business behind the campaign. Running an e-commerce business myself has taught me to look beyond clicks, impressions, and engagement and focus on what actually contributes to growth.”*
